

OMBISEC®

Skin care solutions

Maintain the skin's
defence barrier

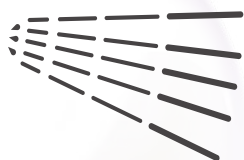

Contrôle Ecocert SA F-32600
Can be used in organic farming according to European
regulation EC 834/2007 in animal production

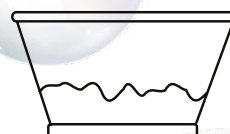

CHARACTERISTICS

- Film forming umbilical cord dry-out solution
- Ready to use / Ultra visible
- Mentholated to deter animals from licking

APPLICATIONS

Spraying

Soaking

- After birth, carefully drain the blood contained in the umbilical cord.
- Apply the solution by spraying or soaking onto the umbilical cord of the new-born.
- Repeat the application if necessary 12 hours later.

EFFICACY

- Ombisec® is an umbilical cord dry-out solution for new-born animals, made from natural plant extracts (including thyme and cinnamon).
- Its film-forming formula provides long-lasting protection for the umbilical cord.
- The presence of essential mint oil deters animals from licking.
- Rinse the spray nozzle thoroughly with water after use.

Ombisec® is available in a 500 ml spray.

For professional use only.
Use the product with caution.
Read the safety data sheet and label before each use.
